DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6 July 2006 has been entered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reasons for allowance for claims 1-25 is that applicant's claimed invention includes an inkjet head having a cavity unit formed of an electrically conductive material with a plurality of nozzles, the plurality of drive electrodes and the plurality of common electrodes being arranged in alternation with respect to a thickness direction of the actuator, where the projected contours of all the drive electrodes fall within a projected contour of one of the common electrodes disposed closest to the cavity unit with respect to the thickness direction. It is this limitation, expressed in the claimed combination not found, taught, or suggested in the prior art that makes these claims allowable over the prior art.

The examiner makes of record that the previous claim objections dated 24 April 2006 are withdrawn in view of applicant's remarks.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
